

# MAXLY GARCÍA

SOFTWARE DEVELOPER

Dominican Republic

maxgarcia6@gmail.com | +1 8298778917 | [LinkedIn](#) | Github Accounts: [Stinger14](#) / [ghostIndshell](#)

## PROFILE

---

Software engineer with over 10 years of experience, formed in OOP with C++/Python transitioned to functional programming leveraging Elixir.

My expertise spans a wide array of areas, including a robust foundation in Object-Oriented Programming, functional programming, Time/Space complexity, SaaS, SOLID, DRY principles.

Moreover, I possess extensive experience with microservices, having adeptly developed and implemented critical business unit services and APIs.

## WORK EXPERIENCE

---

### Freelance Software Engineer (wip projects)

**Dominican Republic (Remote)**  
Mar 2023 – Present

- Develop a digital inventory system from scratch aimed at facilitating stock tracking and product tracing(Elixir/Phoenix, Postgres, ETS)
- Implement a Relay-only E2EE Chat(cyphertext) for a LiveView app integration.
- Contribute Open Source elixir projects.

*Techstack: Elixir/Phoenix, TailwindCSS, PostgreSQL, Docker*

### Zubale Senior Software Engineer

**Mexico (Remote)**  
Feb 2022 – Jan 2023

- Helped transform monolithic applications into a microservices architecture, enhancing scalability and maintainability, or B2B platform.
- Elevated service reliability by resolving bugs within Django and Elixir frameworks, leading to a 30% decrease in service downtime and ensuring uninterrupted operations for users.
- Implemented Continuous Integration/Continuous Deployment (CI/CD) pipelines to automate software delivery processes, accelerating deployment cycles and improving overall software quality.
- Empowered real-time data accessibility by implementing Phoenix's channels, enabling dynamic and responsive data fetching for enhanced user experiences.

*Techstack: Python, Django, Elixir, Kubernetes, Google Cloud Platform (GCP), CI/CD, Apache Airflow, Apache Kafka, Scrum.*

- Innovated internal workflows by developing custom Python tools, including scrapers and QT UI, resulting in a 30% increase in productivity and a 50% reduction in manual tasks.
- Optimized deployment processes by orchestrating the migration of services into Docker containers, reducing deployment time and enhancing scalability.
- Enhanced data analysis capabilities by processing large datasets using Jupyter notebooks and Pandas.
- Automated data extraction tasks by building web scrapers with BeautifulSoup4, increasing data acquisition efficiency and providing real-time updates for decision-making processes.

*Techstack and Additional skills: Python, Django, Flask, Jupyter notebooks, Pandas, BeautifulSoup4, Docker,*

## STACK & SKILLS

---

**Programming Languages:** Elixir, Python, C++, SQL

**Frameworks and Tools:** Phoenix/LiveView, ETS,, Django, FastAPI, Flask, Pandas, TailwindCSS, Docker, K8's, Redis, Google Cloud Platform (GCP), AWS S3, Git, Github Actions, Grafana

**Database:** PostgreSQL, Redis

## EDUCATION

---

**Pontificia Universidad Católica Madre y Maestra (PUCMM), Santo Domingo**

Computer Software Engineering

## LANGUAGES

---

**English:** Full professional proficiency

**Spanish:** Native
